Dear Requester

Thank you for your request for information about pollution incidents, which we received on 6 February 2026. Your request has been considered under the Environmental Information Regulations 2004 (EIR).

You requested:

1. How many times have Anglian Water attended incidents of pollution at the Deene Quarry site and Rockingham Speedway in Corby in the past 10 years

EIR Response: Provision of Requested Information

Please find attached:

- Gretton Brook EIR request.xlsx

Item 1 is held by Anglian Water and has been provided as an attachment.

The data provided is an extract of the Environment Agency's National Incident Recording System (NIRS) for the request. The Environment Agency are responsible for the recording and classification of pollution incidents in line with the Common Incident Classification Scheme. The extract provided is for all data held from 2016-2025, for the location Gretton. The spreadsheet contains a list of discharges to the environment which have had a category 3 (minor) and above impact. Please note events occurring in 2025 have not yet been verified or confirmed by the Environment Agency. Given the source data is from the Environment Agency you may wish to seek additional information regarding the assessed environmental impact from them directly.

Please note, the majority of discharges to the environment from water company assets are sewage, storm sewage or potable water. Your request makes reference to toxic waste/contaminants, whilst sewage can be harmful to the environment, it is not typically viewed as toxic at low levels. The majority of discharges have a minor impact to the environment, we also ensure through recovery activity and monitoring that impacts do not persist.
